How Pano Helps Protect Communities From Wildfire

Mason Bates
Senior Associate, Customer Success & Community Engagement

Who We Are

The leader in AI-powered wildfire detection and situational awareness, supporting emergency managers on the front lines of the wildfire crisis

1,400+
cameras
deployed

72M+
acres monitored
across 20 states

1,500+
fire agencies
onboarded

4,400+
agency users
registered

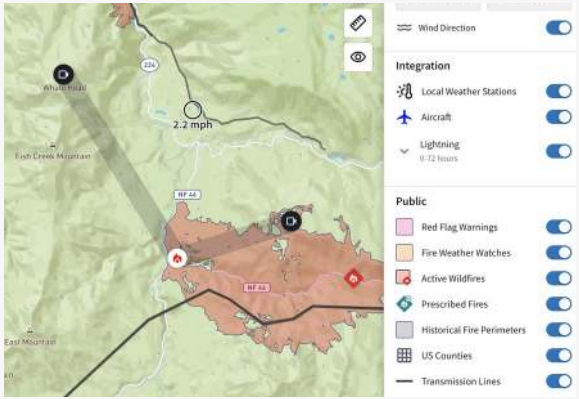

How Pano Works in the Field

AI Detections Reviewed by Human Analysts

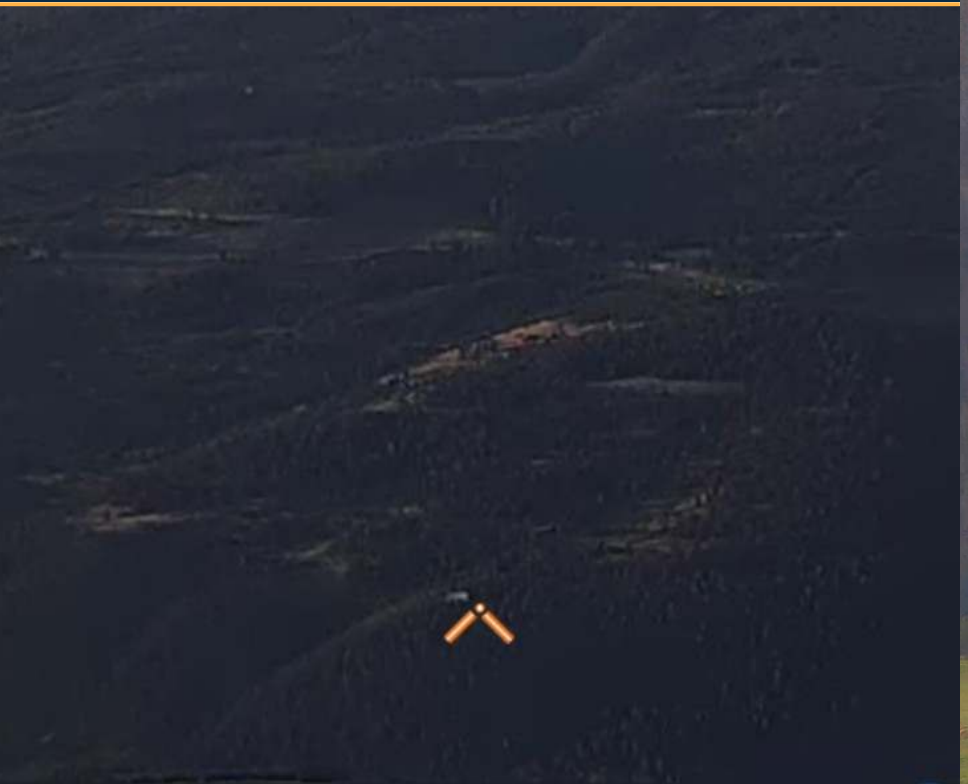

Real-Time Alerts Delivered to Fire Agencies

Situational Awareness Through Software Platform

Pano was **first to alert** on the Moonlight Creek Fire near Big Sky, MT, in July. Big Sky Fire Dept and USFS contained the fire at **<1 acre**.

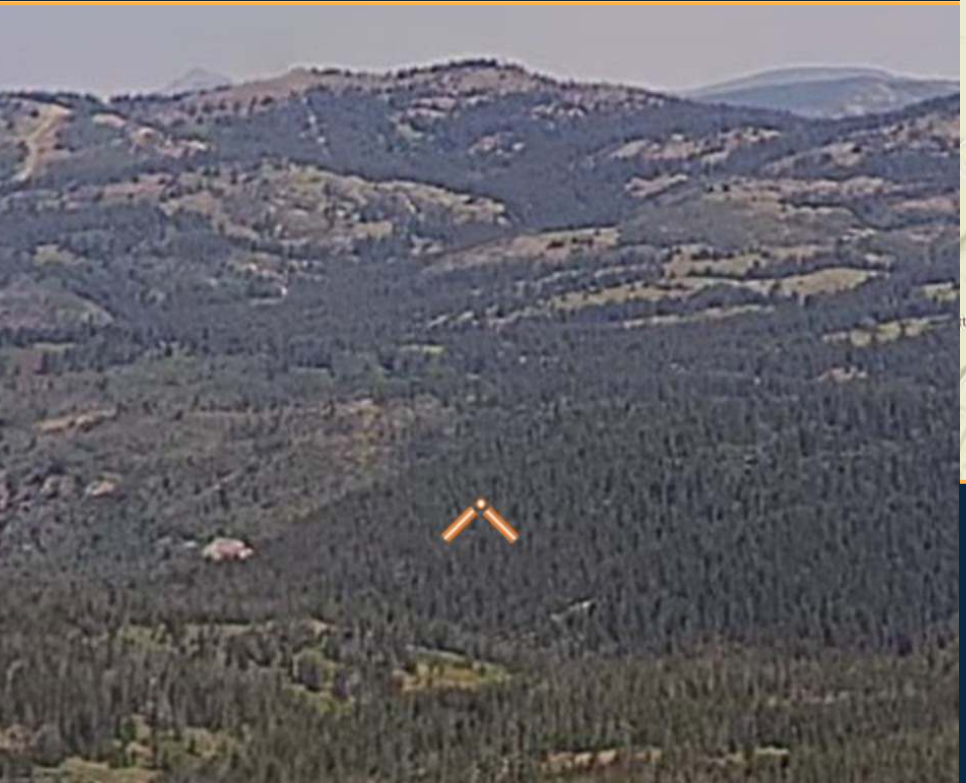

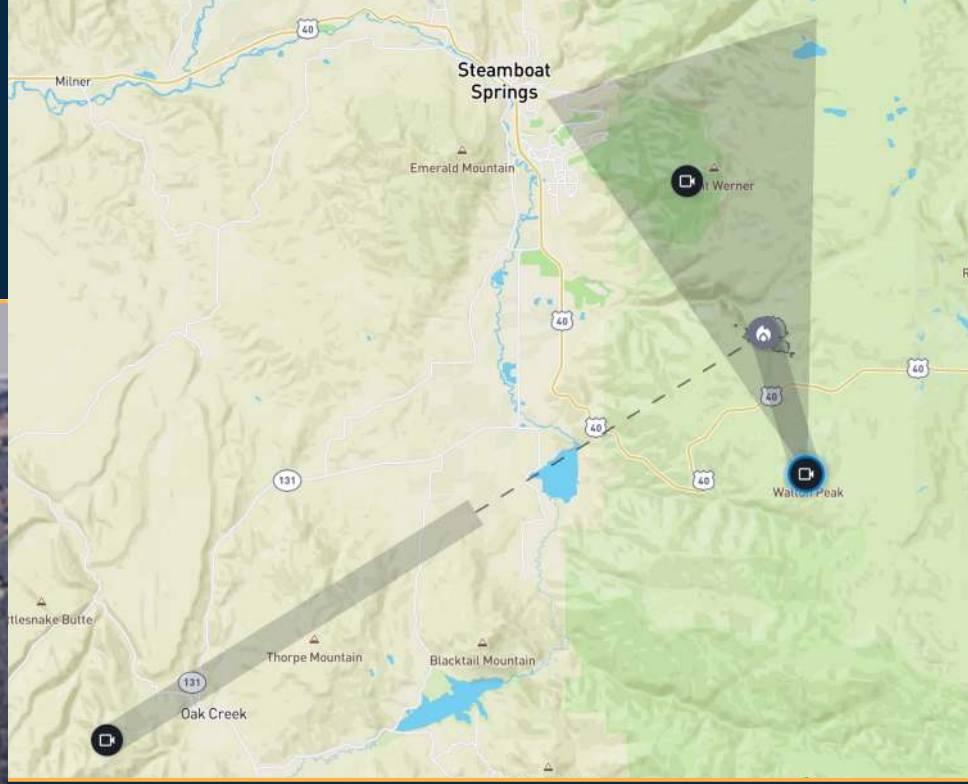

Pano's optical zoom imagery

*"Pano's coordinates were **within 60 feet** of the incident, and the **video quality was high**. I was able to copy and paste the coordinates directly into my mapping platform."*

- Dan Sheil, Big Sky Fire Dept Battalion Chief

Pano was **first to alert** on both the **Fishhook Fire** and **Green Ridge Fire** near Steamboat Springs, CO, in July.

The fires ignited under **challenging conditions**, with hot temps, low humidity, and dry fuels, threatening the ski town and **~500 structures**.

Fishhook Fire

Routt County, CO, July 2026

- **Detect:** Pano delivers first known alert with visual confirmation, prompting response from local agencies and USFS
- **Locate:** Pano triangulates fire location, enabling initial attack agencies to identify best route into rugged terrain

Pano's optical zoom imagery

Fishhook Fire

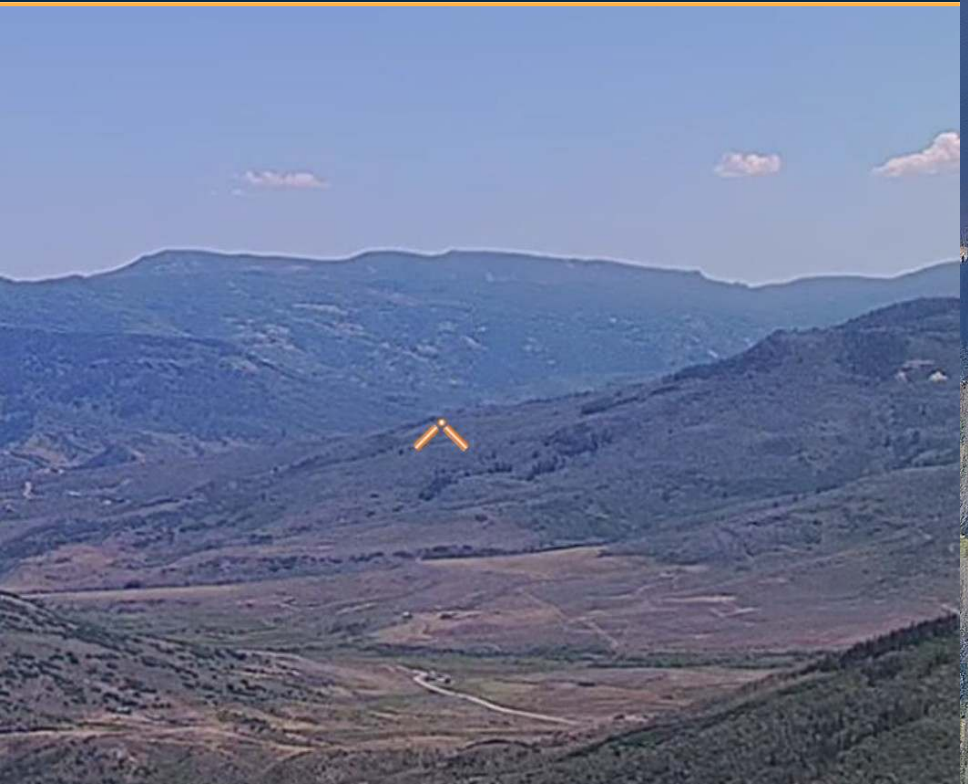

Routt County, CO, July 2026

- **Respond:** Air-resources, ground crews, and eventually IMT are ordered to suppress the fire
- **Contain:** Responders contain the fire at ~300 acres two weeks later

Pano's optical zoom imagery

Pano was **first to alert** on the Green Ridge Fire near Oak Creek, CO, in July. Multiagency attack through DFPC IMT, Initial Attack Agencies, and USFS contained the fire at 41 acres.

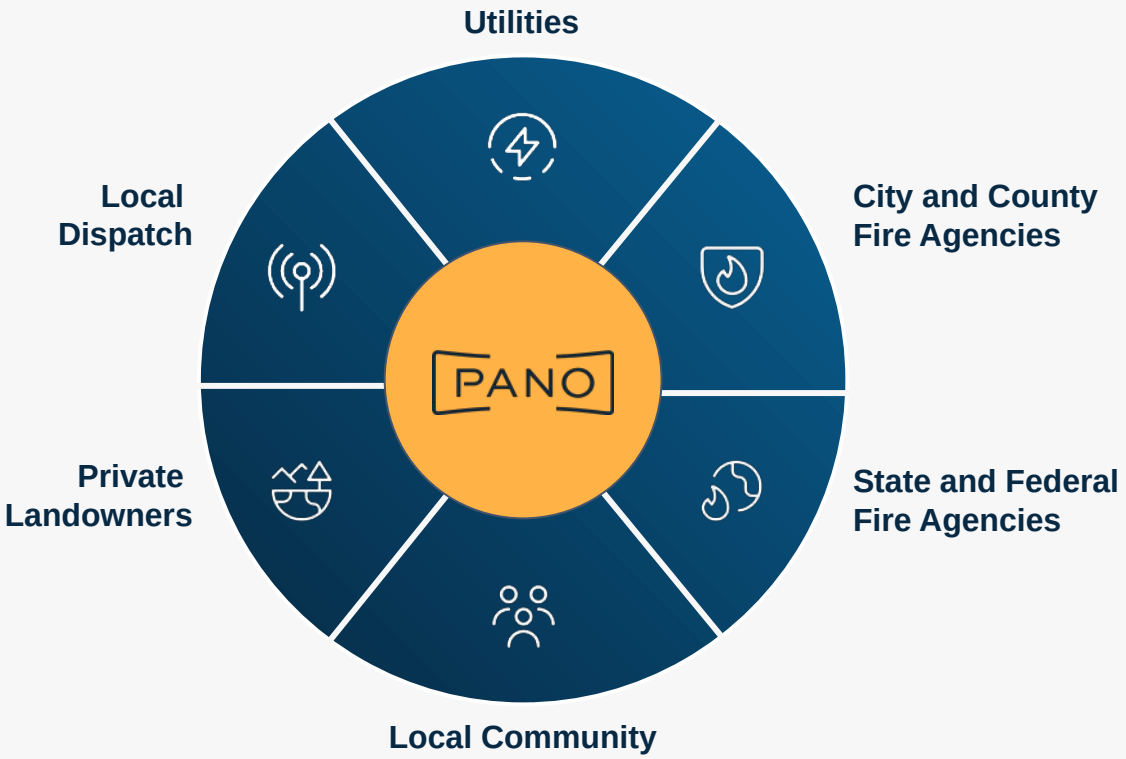

Pano's optical zoom imagery

*"This allowed us to start diverting ground and aerial resources to the Green Ridge Fire, which was **critical** in **saving structures**."*

- Kenyon Shephard, Oak Creek Fire Protection District
